June 05 - 07, 2024, Yashobhoomi (IICC), Dwarka, New Delhi

## Welcome Note

The Food Processing sector in India has a quintessential role in linking Indian farmers to consumers in the domestic and international markets. Recognizing the potential of food processing sector in transforming India as the food basket of the world, Govt. of India is adopting measures to channelize investments encompassing every step of food processing value chain right from food processing equipment, processing related R&D, cold chain storage solutions, packaging, startups, logistics to food retail. This opens up plethora of opportunities for suppliers to food processing industry.

Inter FoodTech and Snack & BakeTec, premier technology supplier fairs for food & beverage, snacks, bakery and confectionery industry along with its concurrent trade fair Pac MechEx scheduled during June 05 - 07, 2024 at Yashoboomi (IICC), Dwarka, New Delhi is gearing up to be the most important trade platform for the suppliers to the food & beverage manufacturing companies to showcase their products & services to explore new business opportunities and strengthen existing business connections.

With well curated supporting programs like seminars, conferences, panel discussions and live demonstrations along with exhibits from over 350 companies from 25 countries, the 3rd edition of Inter FoodTech, Snack & BakeTec and Pac MechEx becomes an ideal platform in India for all the stakeholders of food & beverage processing industry to engage and establish business.

We extend our warm welcome to all the stakeholders of food, beverage, snacks, bakery and confectionery industry to Inter FoodTech, Snack & BakeTec and Pac MechEx 2024.

Ashwani Pande  
CEO

Mukhtar Pathan  
Director - Sales

## Concurrent Events

**FICCI Food World India 2024** : Global Convention for Food Business & Industry

**Date:** June 05, 2024

**Venue:** Yashoboomi, IICC, New Delhi

Given the future growth potential and importance of food processing industry in India's economic and social outlook, it is time to take action to unlock the full potential of the food processing industry with a special focus on export markets. Recognizing this, FICCI is organizing the 15th Edition of "FICCI FOODWORLD INDIA" at the Yashoboomi, IICC, Dwarka, New Delhi. Every year, FICCI Food Processing Division and CIFTI organize "FICCI FOODWORLD INDIA" with the objective to provide a platform to the industry stakeholder for the discussion on the key policy issues pertaining to the sector and chalking down the roadmap for the growth of the sector.

To participate in this conference as a panellist or as an attendee, please write to: [sakshi.saini@ficci.com](mailto:sakshi.saini@ficci.com)  
[www.ficcifoodworld.com](http://www.ficcifoodworld.com)

Seminar on "Technological interventions in Indian Dairy"

**Date:** June 6, 2024

**Venue:** Yashoboomi, IICC, New Delhi

Indian Dairy Association (IDA), the apex body for the dairy Industry in India, has been providing a common forums to knit the fraternity together and thus, over the years, it has emerged as an important knowledge centre. IDA functions very closely with the dairy producers, professionals & planners, scientists & educationists, institutions and organizations associated with the development of dairying in India. As part of its industry reach activities, IDA shall organize Seminar on "Technological interventions in Indian Dairy" concurrent to Inter FoodTech exhibition on June 6, 2024.

To participate in this seminar as a panellist or as an attendee, please write to: [hariom.gulati@indiandairyassociation.org](mailto:hariom.gulati@indiandairyassociation.org)

**AFTPAI's Food Technology Forum**

**Date:** June 06, 2024

**Venue:** Yashoboomi, IICC, New Delhi

Agro & Food Processing Equipment & Technology Providers Association Of India (AFTPAI) is a nodal body representing the interests of food processing, packaging, and allied technology suppliers. AFTPAI shall organize the debut edition of "AFTPAI's Food Technology Forum" on June 06, 2024 concurrent to Inter FoodTech trade fair. As part of this activity, AFTPAI shall organize 2 panel discussions on the following topics:

1. Improving efficiency & quality with Automation in Food Processing
2. Food Processing Technology – Trends & Challenges

To participate in this forum as a panellist or as an attendee, please write to: [aftpaiorg@gmail.com](mailto:aftpaiorg@gmail.com)

## P.F.M. S.P.A. / SPS PACK ITALIANA PACK SYSTEMS

**pfm**  
packaging machinery

**SPS**  
italiana pack systems

SPS specialize in fully automatic packaging systems for bakery and confectionary applications, as well as sandwiching systems. SPS build systems to take off products arriving from ovens and cooling tunnels as biscuits, bars, cakes and wafers in order to create different pack configurations by means of automatic systems and finally wrap them in pillow pack.

PFM S.p.A. Packaging Machinery is the parent company of the Group and co-ordinates the administration, technical and commercial operations of all group companies. Based in Torrelvelicino in the province of Vicenza, PFM S.p.A. Packaging Machinery designs, builds and markets around 40 models of flow-wrapping and vertical form-fill-seal machines together with various automatic feed systems and the ancillary equipment employed for custom-made installations. Machines are produced for various sectors of the food industry including cheese, meat, confectionery, bakery goods, fruit and vegetables as well as non-food industries such as pharmaceuticals and cosmetics.

KANCHAN METALS PVT. LTD.

**KANCHAN**  
SINCE 1984

We are a company dedicated to providing complete solutions to the needs of food processing companies in India. We

partner with renowned international food processing equipment manufactures and provide the market with quality equipment and after sales service of the highest standard. From humble beginnings in the late 90's, we have emerged as a strong partner to our customers serving them with need based solutions at affordable prices while never compromising on the quality of our equipment.

Our Strengths: End to end solutions for the food processing; Highly skilled after sales service support; 30+ Years of experience in automation of various international & regional snack food products; We provide full import solutions right from procurement to delivery of equipment to your doorstep and commission; We manufacture various types of food conveying and processing systems that will integrate with imported processing lines to drive down cost with a focus on snack food & namkeen. We also manufacture own line of machines to cater to the Indian indigenous fast food category. Our machines include complete random style extruded snack production line, automatic bhujia/sev production line, Automatic ethnic mixture blending line. Further, we also offer various conveying solutions, forced air coolers, bucket elevators, seasoning drum and namkeen extruders with capacities ranging from 500 kg/hr to 3000 kg/hr.

The specific market category's for which we offer equipment are - snack food, bakery, ready meals, frozen food, meat processing and hygiene & packing.

We represent following companies in India catering snack food, bakery, meat processing, instant food, confectionery & Indian sweets and hygiene and packaging sectors: AC Horn Manufacturing, USA \* American Extrusion International, USA \* DEIGHTON Manufacturing (UK) Ltd. \* DIOSNA Dierks & Söhne GmbH, Germany \* Foodtools, USA \* Fuji Manufacturing Co. **BUHLER**

**BUHLER (INDIA) PVT. LTD.**

Bühler Consumer Foods at a glance: We want all people to be able to enjoy sweets, baked products, nuts, chocolate, and coffee in good conscience. This means transforming safe raw materials into optimized recipes. It also means carefully handling raw materials, supporting sustainable value chains, reducing waste, and increasing energy efficiency throughout production.

Consumer Foods is all about end products. Whatever the product, from crunchy ice-cream cones, to chocolates, cookies, wafers, pralines, and snacks, quality is at the forefront. Our Bakery business brings together expertise in processing flour, sugar, creams, nougat, chocolate, marshmallow, dairy, and non-food products as well as premixing flours, cereals, and spices. Wafer offers tailor-made solutions for baking, filling, and cutting. Biscuit is specialized in processing cookies and crackers. Chocolate & Coffee is specialized in cleaning, roasting, grinding, and finishing raw materials, while Confectionery is responsible for shaping liquid chocolates into pralines and bars as well as coating wafers and cookies with chocolate.

**Bakery**

Bakery offers process and handling solutions for dry and liquid ingredients for a range of consumer products for the baked goods, premix, confectionery, and dairy industries.

**Wafer**

Wafer is the foremost solution provider for flat or hollow wafers, wafer sticks, cones, and soft waffles. Put your trust in the world market leader that unites quality, tradition, and progress.

**Biscuit**

Biscuit is the specialist for cookies, cakes, crackers, and more, providing machines with shorter baking terms that consume less energy and provide full control over dough moisture content.

**Chocolate & Coffee**

Chocolate & Coffee provides complete solutions for processing cocoa beans to high-quality chocolate masses and develops coffee and nuts into tasty end products.

**Confectionery**

Buhler Confectionery offers unique solutions to mould chocolate in any shape and form. It offers technologies to produce cereal, protein, fruit and nut bars, plain or enrobed with chocolate.

The joy these business units can offer with integrated solutions shines when doughs, nuts, and chocolate are combined into many different end products. Close collaboration with Grains & Food results in more seamless process chains starting with grains, incorporating grinding and extrusion, and ensuring efficiency, food safety, and transparency with visual sorting and digital services.

## URSCHEL INDIA TRADING PVT. LTD.

The Comitrol Processor Model 1700 accommodates all three types of reduction heads which enables a broad spectrum of product processing capabilities. It is recommended for free-flowing dry and semi-dry product applications including textured vegetable protein, peanut butter, chicken slurries, surimi, baby food, dehydrated potato flakes, fruit and vegetable pastes, horseradish and dressings, extruded products, biscuits and cookies, nuts, fruit pulp, various spices, corn masa, hard cheeses, and a variety of gels, ointments, and creams. This precision cutting principle has proven to be a processing breakthrough, with the versatility to meet your size reduction needs from coin size particles to fine emulsions. Standard operations include comminuting, granulating, milling, flaking, slicing, liquefying, dispersing, and pureeing. Sealed enclosure deters escape of dust, vapor, and liquid when the Comitrol Processor is installed in conjunction with a collection system. Stainless steel construction ensures maximum durability and sanitation. The machine features continuous operation for uninterrupted production, and is designed for easy cleanup and maintenance.

The new Sprint 2™ Dicer builds on the popularity of the DiversaCut Sprint and is inspired by the longstanding success of the Urschel Model G Dicer. The Sprint 2 offers food processors an alternative to the industry-proven Urschel Model G Dicer and additional benefits compared to the DiversaCut Sprint. The Sprint 2 uniformly dices, strip cuts, granulates, or slices a wide variety of vegetables, fruits, bakery goods, and meats. Motor choices include a stainless steel 3 HP (2.2 kW) motor controlled by a VFD (variable frequency drive) - more power versus the standard Model G or DiversaCut Sprint. New dial-in slice adjustment with lock-down knob ensures closer tolerances throughout production runs. Sanitary in design, the food cutting zone is completely isolated from the mechanical zone; rounded tube frame and sloped sheet metal contribute to overall sanitation. Hinged access panels promote sanitation and ease of maintenance. The machine accepts product input up to 6.5" (165.1 mm) in any dimension.

The Urschel § Model CC uniformly slices, strip cuts, shreds and granulates a wide variety of food products at high production capabilities with excellent results. Among these products are potatoes for chips, shredded cheese for pizza topping, mushrooms, cabbage, lettuce, onions and carrots for salad ingredients, and a wide variety of nut meats for bakery ingredients. The versatile machine features interchangeable cutting heads that enable the processor to change the type of cut in just minutes. Specially designed knives do not require

sharpening and are inexpensive to replace. The Model CC features continuous operation for uninterrupted production and is designed for easy cleanup and maintenance. The Model CC will accept products measuring up to 4" (101.6 mm) in any dimension.

## LOESCH VERPACKUNGSTECHNIK GMBH + CO. KG

### LoeschPack PIEPENBROCK GROUP

LoeschPack is a technology and quality leader in packaging machines and complete

systems for packaging chocolate, chewing gum, confectionery, cookies and wafers, cereal and protein bars, pharmaceutical products, and food and non-food products. In these dynamic industries, we have been developing optimal system solutions for your products since 1919. We stand for precise, reliable, hygienic, flexible, efficient, and innovative packaging systems that are gentle on the product. And for end-to-end service, available around the globe. We offer comprehensive solutions over the entire life cycle of your system – from the initial idea and engineering to construction and commissioning and all the way through to training and spare parts.

Fold wraps, flow packs, primary or end-of-line packaging, singles or multipacks, stacked, shingled, wrapped, folded, or rolled. Our packaging solutions are as unique as your product. Excellent product protection, high performance, format flexibility, and top packaging quality are not optional – they're our lifeblood. Our employees are specialists with an in-depth understanding of the

challenges they face in production operations. We understand our customers' businesses – at all levels of the undertaking, from management to engineering to skilled worker. Our approach is all-embracing and fosters personal responsibility at work. Flat, transparent hierarchies ensure an unbureaucratic atmosphere

and quick decision-making. We attach great importance to maximum transparency, quality, and lean processes; to end-to-end project management; and to involving all the affected departments. You can trust our machinery and solutions in your value chain. We call this corporate excellence.

## DUMOULIN COATING EQUIPMENT

### Dumoulin COATING EQUIPMENT

Dumoulin is a family-owned company since 1932. Originally trading various processing equipment for dairy, bakery, confectionery. In the 50th's, Dumoulin

developed the first automatic coating machine. Since then, the company is specialized in automatic coating machine mainly for sugar and chocolate coated product, sold in all around the world. There are 2 types of machines: sugar and sugarfree coating and chocolate coating with different characteristics which allow the machine to be the most efficient. The particularity with these machines is the possibility to make the entire process during the same batch without any storage or drying time between the coating part and the varnishing part.

These standard features have resulted in Dumoulin reputation for fast, efficient, and high-quality coating with the highest production capacity.

Dumoulin is providing coating machine, but also peripherals equipment to let the operator controlling all the parameters as the air handling unit, to load and unload the equipment in the easiest way.

Dumoulin is not only a seller of equipment, but also providing support and assistance. We do have senior expert in process who are working for 30 years in the company. Dumoulin process engineers will allow you to make a lot of nice products. Maintenance support with technician and engineer can be also provided. Customer satisfaction is our top priority. Today Dumoulin is leader on the automatic coating machine world market.

## HEAT AND CONTROL (SOUTH ASIA) PVT. LTD.

HEAT AND CONTROL

Heat And Control - We are process and product technologists committed to advancing food and other industries with science and imagination. Whether you measure success by flavor, efficiencies, improvement, or innovation, count on us to deliver results. Our R&D department is constantly innovating and therefore creating better products. We are passionate about excellence and doing our work right the first time. Thus, our reputation depends on our delivered value in the eyes of every customer. By combining our multinational expertise with our deep roots in diverse local markets, we're continuing to provide a range of products to suit a wealth of customers which are "best in class" in terms of value received for quality. In India, we have expertise in:

- Potato Chips Line - Fabricated, Kettle, Regular
- French Fry Lines
- Namkeen Line
- Tortilla Chips Line
- Extruded Products Line
- Prepared foods
- Samosa Line

- Corn Chips Line
- Coated Peanut Line ( Roasted and Fried)
- Seasoning - Dry / Oil and Dry / Slurry
- Distribution Systems
- Packaging

Flavorite Technologies Private Limited, a recognized and established food engineering Company and wholly owned subsidiary of world renowned 'Heat and Control' in the processed food machinery manufacturing in India and abroad. Flavorite with a vast experience and expertise are committed to serve and meet the challenges and needs of growing demand of process food industry globally. Flavorite has established its name in the food processing sector with a global and long term outlook. An association with Heat and Control has given us an added technical edge in serving our esteemed clientele in the best manner possible.

- Potato Chips Fryer
- Snacks Fryer
- Moong Dal Fryer
- Poha
- Corn Flakes Fryer
- Pellet Fryer
- Extruded Snacks Fryer

## AASTED APS

**About Aasted ApS**  
A worldwide market leading manufacturer of production solutions within the chocolate, bakery, and confectionery industries.

Aasted is a Danish consolidated and family-owned company that has always been driven by a passion for innovation and pushing the boundaries. Currently, CEO Piet Tæstensen continues to lead Aasted towards new heights by offering the best quality and continuous innovation. Quality and innovation are upheld by the strong merger with A.E Nielsen in 2010, which enabled the company to deliver a complete range of products to its valued

customers.

Aasted supplies complete processing lines, machinery and equipment for the chocolate, bakery and confectionery industries around the world. At Aasted the mission for success does not stop at the product. We strive towards excelling at aftersales and services, to provide our customers with flexible and tailor-made solutions adaptable to any requirement. Regardless of our customers' geographic location, we will guarantee fast and efficient service anytime, anywhere.

Some of our products...

- **NEW Aasted Nielsen Enrober:** its rail system allows a safe transfer of interior units to the service trolley to easily change the enrobing band, pumping unit, and tray.
- **The Alice II Extruder and depositor** is completely made of stainless steel. Its pressure-controlled feeding system ensures accurate deposits.

- **The Aasted Dough Feeder** with a two-belt modular belt system. This machine can easily be taken apart for cleaning, belt change, or product changeover, making it very flexible.
- **The StellaNova tempering machine** needs up to 30% less energy compared to traditional tempering machines. It keeps the chocolate in the crystallization zone longer and uses unique scraper wings and precise temperature control.

## MIDDLEBY INDIA ENGINEERING PVT. LTD.

The Middleby Bakery Brands provide reliable low and high volume production solutions for bread, rolls and

buns, as well as cakes, crackers, biscuits, baked snacks and much more. Our range covers all industrial baking processes, from dough mixing, feeding and forming, laminating and sheeting to baking and cooling, as well as automatic handling solutions for de-panning and feed to slicers and baggers, producing consistent products with a high quality finish.

Global manufacturing, sales and support meet increasing demands for advanced technologies in food production. Innovative, best-in-class equipment solutions for both high volume and smaller producers. We offer a one-stop destination for turnkey equipment solutions. While our equipment is powerful enough to meet the demands of the highest volume processors, we also offer scaled down systems and single machine solutions.

With decades of deep industry and technical expertise, we bring together food processing insight, best practices, breakthrough / disruptive equipment solutions and systems innovation. We consistently provide on-time deliveries, smooth startups, and optimized processes, all of which ultimately equate to very favorable returns on investment.

Lowest cost of ownership - Optimized Capital Investment – Minimized Operating Costs – Maximized Capacity Utilization. Put Middleby's know-how to work for you!

**mtsfoods.**

MTSfoods specializes in providing end to end solutions for the food processing industry and is steered by some of the finest professionals in the food processing application development space. The company is driven by an efficient team and mentored by the brightest minds in the food processing industry globally. Mtsfoods focuses on driving excellence in adapting global best practices in technology and standards for food processing in India. MTSfoods delivers the best available globally through exclusive alliances with global stalwarts in equipment, process and technology- which include Vanmark, Tomra, FAM and several class leading technology and solution providers from around the world. The company poised to leverage the strengths of three major principals for peeling, conveying, sorting and cutting apart from comprehensive turnkey solutions for food processing.

**FAM STUMABO** – one company, two strong brands – focuses on developing industrial cutting machines and manufacturing precision knives for the food

industry. We provide customers with the solutions they need for the cutting, slicing, and dicing of vegetables, fruits & nuts, cheese, meat & poultry, fish, potato chips and French fries. With almost 80 years of combined experience, we are a global company that has established long-lasting close cooperation with highly reliable influential companies, customers, and partners in the industrial food processing market.

FAM STUMABO is present on all continents, with customer experience centers, stocks, and services.

**TOMRA** Food is the leading provider of sensor-based sorting and grading technology for the food industry. In the developing

world, there is a need for more automation within food processing. In developed markets, the emphasis is on food quality, productivity, and hygiene.

TOMRA is positioned to serve customers in both the fresh produce sector (such as fruits and vegetables), and processed food (such as nuts, potatoes, and frozen vegetables). With over 13,800 installations globally, TOMRA's food is instrumental in transforming global food production to maximize food safety and minimize food loss, by making sure Every Resource Counts™.

TOMRA Food is a division of TOMRA Group. Founded in 1972, TOMRA began with the design, manufacturing, and sale of reverse vending machines (RVMS) for automated collection of used beverage containers.

Today, TOMRA is leading the resource revolution to transform how the planet's resources are obtained, used, and reused to enable a world without waste. The company's other business divisions are TOMRA Recycling and TOMRA Collection.

TOMRA has approximately 105,000 installations in over 100 markets worldwide and had total revenues of about 12 billion NOK in 2022. The TOMRA Group employs 5,000 people globally and is publicly listed on the Oslo Stock Exchange.

**Vanmark** equipment continuously processes thousands of pounds of potatoes, fruits, and vegetables - from receiving

to washing, peeling, and hydrocutting to storing and transferring product throughout the line. Our machines are designed for easy use, long production runs, and minimal maintenance.

Our Bengaluru, India facility manufactures and supports equipment for Southeast Asia – eliminating tariffs, reducing lead time, and providing fast local service.

Rely on Vanmark to give your potato chips, fries, and produce business a competitive edge.

Our Address: Solus-Jain Heights, E-10,10th Floor, #2, 1st Cross, J.C.Road, Bengaluru,Karnataka, 560027. Contact : 080 2222 4222 / 23 & enquiry@mtsfoods.com

## ARR FOOD MACHINES

HYWAY Procons Pvt. Ltd. is a renowned manufacturer specializing in product handling conveyors, industrial washers for crates, pallets, trays, and industrial ribbon blenders. Formerly known as ARR Food Machines, our company

has undergone a transformation to reflect our commitment to innovation, quality, and customer satisfaction. With a strong focus on catering to the needs of industries such as food, snacks, pharma, dairy & Ice-cream, Meat & fish, warehousing, and fulfillment centers, we offer cutting-edge solutions that streamline production processes and enhance efficiency.

**Products and Services:** Product Handling Conveyors: We design, manufacture, and install a comprehensive range of product handling conveyors tailored to the unique requirements of our clients across various industries; Our conveyors are engineered for seamless material handling, facilitating the movement of raw materials, semi-processed, and packed products throughout the production process; They are equipped with advanced features and functionalities to ensure reliability, versatility, and efficiency in diverse production environments.

**Industrial Washers:** Our industrial washers are designed to meet the stringent cleaning requirements of crates, pallets, trays, and other containers used in food processing, pharmaceutical, and beverage industries; With state-of-the-art washing technology, our washers deliver thorough cleaning, removing contaminants and residues to maintain optimal hygiene standards; We offer customizable solutions with a range of washing cycles, water temperatures, and detergent systems to suit specific cleaning needs.

**Industrial Ribbon Blender:** Our industrial ribbon blenders are engineered for precision mixing and blending of dry and wet ingredients across various manufacturing sectors; Featuring robust construction and efficient mixing mechanisms, our ribbon blenders ensure uniform blending, resulting in consistent product quality and texture; They are widely used in food, pharmaceutical,

chemical, and cosmetic industries for achieving homogeneous mixtures of ingredients.

**Key Features and Technologies:** Smart Conveyors: Our conveyors are equipped with smart technology, allowing seamless integration with existing ERP or SAP systems for efficient production management; AI-Based Sensors: Integrated AI-based sensors enable real-time tracking and online inspection, enhancing quality control and product traceability; Customization: We offer tailored solutions to meet specific industry requirements, ensuring optimal performance and productivity; Reliability: Our products are built to withstand the rigors of industrial use, prioritizing durability, and long-term reliability; Efficiency: By optimizing material handling processes, we help our clients improve productivity, reduce downtime, and minimize operating costs.

**Clientele:** HYWAY Procons Pvt. Ltd. serves a prestigious clientele comprising leading companies in the food, snacks, pharma, dairy & Ice-cream, Meat & fish, warehousing, and fulfillment centers. We have established enduring partnerships with our clients by delivering superior-quality solutions and exceptional customer service.

**Mission Statement:** At HYWAY Procons Pvt. Ltd., our mission is to provide innovative, reliable, and efficient product handling solutions that empower our clients to optimize their production processes, enhance product quality, and achieve sustainable growth.

## KIRON FOOD PROCESSING TECHNOLOGIES LLP.

Kiron Food Processing Technologies (KFPT) has been a pivotal force in the food processing industry for over a decade, spearheading innovative solutions and facilitating connections

between top food processing system manufacturers worldwide and India's thriving processed food sector. Our expertise lies in a comprehensive range of engineering capabilities coupled with indigenous knowledge, setting exemplary standards in core values such as Global Technology, Project Engineering Capabilities, Simplified Solutions, prompt support, and after-sales service.

We boast extensive involvement across diverse product categories including Snacks, Dairy products, Dried Fruits and Nuts, Fruits and Vegetables, Grains, Bakery and baked goods, candy, as well as non-food items like detergents etc. Our portfolio also encompasses vibratory feeders and conveyors capable of handling a wide range of particle sizes, designed with robustness and versatility in mind, suitable for demanding environmental conditions, especially in the food and chemical industries.

At KFPT, we take pride in our deep-rooted relationships within the industry and leverage our in-house team of Engineers and Designers to offer licensed manufacturing services for esteemed global equipment manufacturers such as Lindor, Intralox, Emve, Tummers, Rosenqvists, Blueprint Automation, among others. Our cutting-edge 85,000 sq. ft. facility in Ahmedabad serves as the nucleus of our manufacturing operations, equipped with state-of-the-art infrastructure to ensure quality and precision.

Headquartered in Mumbai, with strategic regional presence in Ahmedabad, Chennai, Sangli, New Delhi, and Pune, we extend our reach to cater to diverse client needs effectively. Complementing our operational setup is a sophisticated testing facility where customers can validate and fine-tune their products with our tailor-made solutions, ensuring seamless integration and optimal performance.

At Kiron Food Processing Technologies, we are committed to driving excellence, fostering innovation, and nurturing enduring partnerships to fuel the growth and success of India's food processing industry.

## FRESH - O - VEG PVT. LTD.

FOV is India's pioneer in food consultancy and agricultural advisory services for more than 26 years. We draw on deep industry expertise to provide end-to-end consultation to food processing companies of all scales. Our

Engineering team and Food technologists use skills to redesign food plants, processes, and machinery. Our in-house solutions include cutting-edge equipment and labs with capabilities in material handling, scanning, time & motion studies, and utility auditing to help increase clients' production & output efficiency.

Our Agro-experts provide solutions for Farm produce procurement, Large-scale farm management, and New product development. This is done via deep-rooted partnerships, agronomy & farm technology competence, as well as product sourcing & processing experience.

Our Re-engineering division uses solutions such as Scan-to-BIM to expand, maintain or amend projects, adding efficiency and cutting input costs. Through its impact on leading food brands and startups, FOV has changed the food industry's dynamics in India.

### ENGINEERING SERVICES

In Agro based and food processing industry, FOV has in-house teams covering every area and aspect like

Architectural planning, Structural Designing, Process engineering requirements, Utility Designing (such as fire, ETP, HVAC, water solutions), Based on process engineering and utility designing we plan material movement

### PLANT SETUP

EQUIPMENT ENGINEERING AND PROCESS REQUIREMENT ASSESSMENT

Define product quality and based on that selection of process and engineering, Packaging equipment selection, Utility selection, Integration of process and utility services, Define scope of mechanization and automation

### FACTORY LAYOUT

Assessment of area requirement, Horizon and adaptability for long term development, Optimization of man, material movement, Food safety and utility integration, Vastu compliant design options

### OPTIMIZE ENGINEERING

Technology requirement, Standard design to explain equipment as per market goal, Inter-linking of utility, energy, water and waste optimization, Automation, Production demand

### PRODUCT PROCESS MANAGEMENT

Systems and process enhancement, Process controls, Process flows, Quality assurance, Safety standards

### 3 D MODELLING OF THE PROJECT

Virtual construction (Architecture / structure / Interior), Clash detection and constructability analysis, Design, development and documentation, Quantity estimation if required

### OUR SPECIALITY FOODS

Traditional indian snacks, Western snacks, Ready to eat / cook, Indian sweets, Frozen, Dehydrated, Vacuum freeze, Pulps and purees, Select bakery products

## NEXGEN HYGIENE SYSTEMS PVT. LTD

Nexgen Hygiene Systems Pvt. Ltd., is an industry leader in providing innovative solutions for the beverage and food processing industries. With 18

years of experience, we take pride in being a pioneer of cutting-edge equipment designed to enhance plant hygiene and efficiency of your food production processes.

Here's a brief introduction to some of our key products: **Air Knife Drying Systems:** Our Air Knife Drying Systems are designed to ensure impeccable surface drying for a number of applications such as bottle drying, cans drying, pouch drying, chips excess water removal, etc.. Our centrifugal blowers provide dry, clean, oil-free air and require very low energy consumption. This is the best alternative for compressed air applications. These systems not only help you maintain the highest quality standards but also improve the overall productivity of your line.

**Personnel Hygiene Stations:** We offer a range of Personnel Hygiene Stations to help you maintain the highest standards of hygiene before entering the production area with functions such as Hand Washing, Hand Drying, Hand Disinfection and Shoes Sole Cleaning. These stations are essential in preventing contamination and ensuring a safe and clean environment for your production area and the team. Our systems are first of its kind in India which ensures almost 100% Hand Hygiene is maintained. With the use of

these machines bacterial level of the hand is reduced towards ZERO.

**Food Processing Machines:** We manufacture machines for IQF plants, Central Kitchens, Cloud Kitchens an large hotels. Our range starts from sorting, grinding, peeling, washing, slicing, dicing, paste making machines for all kinds of fruits and vegetables. Our food processing machines are engineered to meet the rigorous demands of modern food production. From cutting-edge automation to impeccable quality control, our machines are designed to streamline your food processing operations.

We believe that our products can add significant value to your operations by improving product quality, enhancing productivity, and ensuring adherence to the highest hygiene standards, ultimately leading to your business's success. Our solutions are crafted with this in mind, and we continuously innovate to stay at the forefront of the industry.

## INNOVATIVE PACKTECH MACHINES PVT. LTD.

**Introduction:** Innovative Packtech Machines Pvt Ltd, a trailblazer in the packaging and food processing manufacturing industry, has been at the forefront of delivering cutting-edge solutions since its inception. With a steadfast commitment to innovation, quality, and sustainability, the company

has been revolutionizing the way products are packaged and processed, ensuring maximum efficiency and minimal environmental impact.

**Innovative Machinery for a Sustainable Future:** At the heart of Innovative Packtech Machines lies a dedication to sustainability. The company's range of advanced machinery emphasizes eco-friendly practices, utilizing the latest technologies to minimize waste and energy consumption. From automatic packaging lines to high-speed food processing equipment, each offering is meticulously designed to reduce the environmental footprint while maintaining peak productivity.

**Empowering Food Manufacturers:** Innovative Packtech Machines has been empowering food manufacturers worldwide with its versatile and customizable solutions. The company's food processing equipment ensures precision, consistency, and hygiene throughout the production process. Whether it's slicing, dicing, sorting, or packaging, their state-of-the-art machinery caters to the diverse needs of the food industry, helping clients enhance their production efficiency and deliver superior quality products to consumers.

**Addressing Global Challenges:** In the face of changing consumer demands and market trends, Innovative Packtech Machines remains agile and adaptive. With a keen focus on research and development, the company continually evolves its products to address emerging challenges and cater to evolving consumer preferences. Additionally, the company actively collaborates with its clientele to develop tailor-made solutions that meet their

unique requirements, making it a reliable partner in their growth journey.

**Exceeding Quality Standards:** Quality is the cornerstone of Innovative Packtech Machines' success. The company adheres to stringent international standards and implements rigorous quality control measures at every stage of manufacturing. This ensures that their machinery is not only durable and reliable but also meets the highest safety and hygiene standards, assuring clients of long-term performance and peace of mind.

**Customer-Centric Approach:** Beyond just manufacturing innovative machinery, the company's approach revolves around forging lasting partnerships with its clients. A dedicated team of experts provides comprehensive support, from consultation and installation to ongoing maintenance and training. This customer-

centric approach has earned Innovative Packtech Machines accolades from its satisfied clientele worldwide.

**Conclusion:** Innovative Packtech Machines Pvt Ltd continues to redefine the packaging and food processing manufacturing landscape with its unwavering commitment to innovation, sustainability, and customer satisfaction. As the world moves towards a greener and more efficient future, the company stands firm as a beacon of progress, offering the tools that enable manufacturers to thrive while safeguarding the planet.

Katha Food Pharma Solutions has been a trusted partner for the Food, Dairy, and Pharmaceutical Industry in India since 2016. Our collaboration with top equipment manufacturers overseas allows us to provide turnkey plants and individual inline equipment for Retorted Food Production. Our state-of-the-art Retort Trial Facility offers services such as New Product Development, Retort Recipe Development, small scale production, training, and demonstration of retort processes. We are proud to work with esteemed partners to deliver innovative solutions to our clients.

### : RETORTS/AUTOCLAVES

STERIFLOW from France is the world leader in design and manufacturing of Industrial Retorts for Food, Dairy and Pharmaceutical Applications. They have more than 4700 installations in around 110 countries including many in India. They are the inventors of Superheated Cascading Water Sterilization Technology. They manufacture a wide range of Retorts: Static, Dali (Gentle-Shaking), Rotary, Shaka, S&A, Bi-Process, Pilot Retorts.

### : Pick Fill Seal Machine for Pre-Formed pouches

We offer a wide range of Pick Fill Seal Machines for Pre-Formed pouches from Green Pack, Korea. Suitable fillers can be designed depending on the product to be filled e.g., Multi Head Weighers/Bowl Type Conveyor etc.

### : Complete Canning Lines / Handling & Automation

Our partners – SECMA CABON from France are specialized in offering customized handling solutions for Food & Beverage Industry. They offer Turnkey plants for Canning Application (from De-Palletization of Empty cans to the palletization of Ready Cans.

### : Metal Detectors & X ray Inspection

Nikka Densok Limited from Japan are one of the leading manufacturers of inspection systems like Metal Detectors and X ray Machines for Food and Pharmaceutical Industry. Their NT Series Metal detectors offer high sensitivity and flexibility by testing both Foil-Non/Foil packs for Ferrous contaminations.

### : MAP Sealers / Thermoforming Machines

APACK from Turkey manufactures premium quality of packaging machines for Rigid Plastic Containers. Experts in MAP (Modified Atmospheric Packaging), they can offer Manual, Semi-Automatic and Fully Automatic packaging machines. They also make Thermoforming Machines for various food applications.

### : High Quality Retort Pouches

Logos Packaging Holdings Ltd. is a Hong Kong based company who produces a broad range of flexible packaging materials for Food, Dairy, Beverages & PET Food applications.

Retort Pouches (Foil/Non-Foil, Printed – Non Printed, Spout) are their specialization. They can also offer RECYCLABLE Retort pouches.

### : Machinery for Mozzarella Cheese Production

COMAT is a brand of excellence in design and manufacturing of machines, production lines and automation plants suitable for pasta filata (Mozzarella Cheese) production. From fully automated big sized plants to small capacity individual equipment, we can cater the needs of small, medium and large cheese producers.

## A&D INSTRUMENTS INDIA PVT. LTD

A&D Instruments India Private Limited (A&D India) a wholly owned subsidiary of A&D Company Limited Japan, setup its Sales and Technical Centre at Gurgaon, Haryana in the year 2008. A&D Company Limited, Japan is a world class producer of advanced measuring, monitoring, controlling and testing instruments.

In India, we are responsible for promotion, sales and after sales services of A&D products like Electronic Weighing Balances & Scales, Viscometers, Moisture Analyzer, Indicators, Load cells, and Medical Products (Blood Pressure Monitors). To ensure easy accessibility of products and services, today we operate through branch offices in Delhi, Kolkata, Mumbai and Hyderabad and nationwide dealer's network.

A&D India strives to increase business coverage to cater to different industries like, Jewellery Industry (Hallmarking Balances, Tounch Balances, Gold Balances, Carat Balances, Silver Balances),

Pharma Industries (Pharma Metal Detector, Pharma Checkweigher, Pharma X-Ray Machine, Tablet Metal Detector, Gravity Fall Metal Detector, Pharma Balances, 21 CFR Part 11) Research Institutes, Scientific/Laboratories (Laboratory Balance, Laboratory Scales) and other Industrial Applications (Indicator, Loadcells, Industrial Balances, Industrial Scales, Counting Balances, Counting Scales, Platform Scales, Customizable Scales), Food Industry (Food Packaging Systems, Food Inspection machine, Food Moisture Analyzer), UTM Universal Testing Machine etc.

Our services include AMC of A&D products and NABL certification for Balances & Scales.

## FILLPACK TECHNOLOGY

**FILLPACK**  
TECHNOLOGY

FILLPACK TECHNOLOGY, an ISO 9001-2015 certified company is strategically headquartered in Ambarnath Maharashtra India with two advanced manufacturing units with skilled technocrats & professionals to ensure quality Processing, Filling, packaging machines & dependable after-sales services.

We offer you the right machine ally for your Dairy, Food, Beverages, Cosmetic and pharmaceutical processing & Packaging by providing custom-made machine solutions as per your need. We ensure that the containment is secure and of the best quality. Fill pack offers multi-disciplinary Engineering design and description Services exploiting intelligent and state of art technology applications.

Our team includes professional engineers having made expertise in industries like Dairy, Food, Beverages, Cosmetics, pharmaceutical, etc.

Our spectrum of products includes various machines like Milk & Milk Product Processing plant, Filling Line for all type Liquid product, Curd Cup Packing Machines, Paneer Equipments, Ice Cream Equipment, Cold Room, Hygienic Stations, Tanks, CIP, etc.

All packaging demands the highest standards of cleanliness, quality, and design – we provide these with flair. we Maintain sterile conditions to ensure your health and that you receive your products in the safest and most convenient packaging.

All of our procedures are annotated with numerous stringent quality checks to ensure that the products that reach our customers are of the best quality in the world.

Finished products go on to our warehouse and are safely stored, and regularly inspected until they are needed for shipping.

Our motto is to ensure our customers have a splendid experience which is why we provide complete support throughout the buying process and even after the product has been received.

## PACE PACKAGING MACHINES PVT. LTD.

**PACE**

Pace Packaging Machines is an organization dedicated to manufacture high quality Vertical Form Fill Seal Machine (VFFS) of International standards. With more

than 2000 Installations in India & abroad in 25+ Countries & with high rate of repeat orders, PACE is one of the leading supplier of machines in snack Industry.

PACE has ISO 9001-2008 quality certification and all PACE machines are CE certified. Technical Capabilities: Robust, rugged, simple & open frame design & construction; First packaging machine to adopt electronic coming through Motion Controller from Siemens – Germany; First to offer network based machine & network capabilities for SCADA & Other MIS products; In-house manufacturing with CAD-CAM for all parts; Efficient spares & service back up with large inventory of spares.

PACE is technological leader for setting up new standards in high speed baggers in challenging products.

## VEDIC PAC SYSTEMS PVT. LTD.

We are the sole partners & representatives of top European manufacturers for following applications: Solids: Feeding, screening, conveying, storing/silos, vacuum weighing/batching, blending/mixing of powders & granules, particularly with difficult flow characteristics. Automated plants for the spice/bakery/pre-mix industry, from **AZO &**

### **AMIXON.**

Liquid Mixing: Homogenizing & Dispersing solutions from **AZO Liquids.**

Processing of confectionery masses: Continuous and Batch cooking for various sugar based masses, such as hard candy / jelly / fondant / toffee / caramel / lozenges from **Chocotech & Nuova Euromec.**

Bar lines, tempering units & enrobers from **Sollich.**

Gum based products: Rolling, Scoring and Extrusion Lines for gums from **Nuova Euromec.**

Lollipops: Forming, Cooling, Wrapping (bunch and twist wrapping) and Packaging of lollipops from **GEA Aquarius.**

Cocoa & Chocolate: Refiners/conches/tanks, Enrobing, Tempering, Moulding, Sprinkling, Decorating, Bar forming, from **BSA Schneider, Sollich, Winkler und Dünnebieb & VormenFabriek Tilburg.**

Extrusion plants for liquorice & starch based products from **ExtruFood.**

Bakery products: such as regular and centre-filled cookies, rotary moulders, depositors, wire cutters & extruders from **O K A**

**Spezialmaschinenfabrik GmbH & Co.KG**

Wafer & Savoury: Fully automated wafer line with baking, batter/cream preparation systems, spreading, forming, cooling & cutting of wafer and Extrusion Snacks with various shapes and sizes from **Hebenstreit GmbH.**

Metal Inspection, X-ray &

Check-weighing Systems: Quality checks to meet the food safety standards, from **Loma Systems- Division of ITW.**

Packaging: Complete range of innovative primary packaging solutions, including Fold wrapping, flow wrapping and twist wrapping from **Theegarten-Pactec.**

And complete range of secondary packaging/cartoning solutions which cover almost every range of speed, type and level of automation, from **Cama Group.**

Vedic Pac Systems supplies end to end solutions for the chocolate, confectionery, bakery & spice industries and has a team of qualified service engineers for installation and commissioning, and a team of sales support for customer's after-sales requirements.

## AAKANKSHA TECHNOLOGIES

**AAKANKSHA TECHNOLOGIES** offers state of the art technology for

**IQF & SPIRAL FREEZER and FREEZE DRYER from PIGO srl ITALY and PASTA MAKING TECHNOLOGY AND SNACK PELLETS MAKING TECHNOLOGY from TECALIT ITALY.**

**PIGO srl** is specialized in manufacturing: EASY Freeze IQF, freezer with fluidised bed, the most suitable for IQF freezing of all possible fruits, vegetables and numerous sea,

meat and cheese products and other many other products which can be fluidized.

Our Freezers are built in modular sizes and all components are made entirely of stainless steel, capable to provide perfect IQF product even working with delicate products like cooked rice, raspberries, tomato cubes, etc...

**EASY Freeze SPYRO – SPIRAL FREEZER**, the latest generation of spiral freezers giving utmost advantages to the users in terms of energy efficiency, hygienic conditions and advanced technological characteristics, the most suitable solution for freezing RTE food and snacks, doughy products, meat and fish, pizza, etc...

**EASY Freeze DRYERS**, the most suitable solution to dehydrate frozen food at very low temperature preserving its texture, flavour, nutritional and organoleptic properties. The process is applied to dry vast number of food products like fruit / berries / vegetables, meat / seafood, soup blocks, rice dishes, etc. Our technology helps to preserve the product's original shape, colour, taste, aroma and nutrients.

**WE, AAKANKSHA TECHNOLOGIES with TECALIT srl ITALY** also offers **PASTA MAKING TECHNOLOGY.** It is one of the best technology for **making short cut pasta, long cut pasta, non gluten pasta, instant pasta.**

We also offer complete line for production of **SNACK PALLET.** Our machines are user friendly and energy efficient. WE can offer line for **DIE CUT PELLETS, 2D CHIPS, DISTANC CUT PELLETS, 3D PELLETS, LAMINATED PELLETS, PUNCHED PELLETS.**

**LINES ARE CAPABLE TO HANDLE CEREAL BASED AS WELL POTATO BASED RAW MATERIAL WHENEVER REQUIRED.**

## MIDWEST FOOD TECHNOLOGY

The Midwest Food Technology manufacturing facility is located in Pune, Maharashtra India.

The facility houses a state-of-the-art stainless steel metal fabrication processor, machine shop, specialised surface treatment facility and in-house control panel testing, specifically designed for freezing applications.

One of our primary motives is to produce the most economical and dependable freezers that is customised to suit individual customer requirements. In order to achieve this we manufacture most of our components in-house, to ensure our product is designed in line with our said objectives.

Midwest Spiral Freezer:

As is common knowledge, the production line in the food processing and production industry depends heavily on specialist commercial freezing systems for smooth and continuous operations. Most commonly referred to as 'spiral freezers' these machines are designed to provide such features as:

Adjust the speed on airflow and conveyor / belt to allow for flexibility in freezing speeds depending upon a particular requirement.

Maintain original product weight during the freezing process.

Ensure quick and consistent freezing of product Retain quality of product with a little to no alteration to original condition during the freezing process.

However, Midwest's spiral freezer goes a step ahead, in offering a system that is high on efficiency and low on maintenance cost. This

done in keeping with a proven and long established mechanical freezing technology. The design of the Midwest spiral freezers, ensures that products are feed directly on to the freezer belt, followed by a quick transportation into the low temperature freezing zone. Our spiral freezer is a single drum concept and food products travel in a down to up motion on a spiral belt along with rotation drum before being discharged gently. The most important aspect in freezing system is to bring about swift product freezing with minimum retention time and minimal dehydration loss. The air-flow and stainless steel evaporator used in the midwest spiral freezers ensure we achieve these results. Not to forget, the MFT maintains stringent hygiene standards with gentle handling of the food products to retain every element of the products original quality.

## TRIMECH ENGINEERS PVT. LTD.

TRIMECH ENGINEERS PVT.LTD is a multi-product company that has been providing engineering solutions to the customer around

the world for Adsorption Based Gas Generators, Air & Gas Drying Equipment's, Material Handling Equipment's and Air-Pollution Control Equipments.

What drives us is our Motto- INNOVATION INEVITABLE. We have vast experience of making custom-built equipment's and turnkey plants. We have also designed systems for materials having special characteristics like inflammable, explosive and hazardous respectively. We believe in innovation and always brain-storm to bring in some new products which are cost-effective and qualitative in nature.

We are ISO 9001:2015 certified Company. We supply equipment's pertaining to international standards including standards incusing European Standards.

We have also exported C E Certified equipment's. We have also exported to countries like USA, Canada, China, Egypt, UAE, Germany, Bangladesh, Sri Lanka, South Africa, Malaysia, Thailand, Taiwan, Sudan and Many More.

TRIMECH was started in the year 2008 in INDIA .Company has 10 years of experience in Design, Engineering, Manufacturing & Commissioning of Adsorption Based Gas Generators, Air & Gas Drying Equipment's & Material Handling Equipment's and Air-Pollution Control Equipments.

Right from inception, TRIMECH ENGINEERS PVT.LTD. Has constantly endeavoured to provide highest quality equipments & services through their regular researches and adoption of latest technologies.

### PRODUCT RANGE

**AIR-GAS DIVISION** · PSA Nitrogen Gas Generators · PSA/VPSA Nitrogen Gas Generators · Biogas Purification Plant · Heat less Air Dryer (Desiccant Dryer) · Heat of Compression Air Dryer · Split Flow Air Dryer · Refrigerator Dryer · Pressure Vessels

**MATERIAL HANDLING EQUIPMENT** · Coal Handling System · Ash Handling System · Apron Feeder · Belt Conveyor · Bucket Elevator · Screw Conveyor · Drag Chain Conveyor · Ash Conditioners · Pneumatic Conveying System

**ACCESSORIES** · Rotary Airlock Valve · Slide Gate Valve · Lump Breaker · Diverter Valve · Bags/Cages for Bag Filteerr

**AIR POLLUTION CONTROL EQUIPMENTS** · Pulse Jet Bag Filter · Dust Collector · Fumes Extraction System · Cyclone Separators · Centrifugal Blower

**OTHER EQUIPMENTS & SYSTEMS** · Agitators · Ribbon Blenders · Storage Tanks / Silos · Magnetic Separator · Mixers

A.G BELTING PVT. LTD.

AG GROUP  
CONVEYING NON-STOP MOVEMENT...

A.G Belting Pvt. Ltd., member of AG GROUP, head quartered in the industrial town Ghaziabad (U.P), in the National Capital Region of INDIA, about 45Kms away from New Delhi International Airport, is involved in manufacturing, fabrication, imports, exports

and distribution of belts and components for **conveying non-stop movement in the industry.** From the humble beginning over 3 decades ago with A. G. Engineers, the flagship company of group, which was started by Mr Aditya K Gupta in the year 1988, we have grown into one of the leading player and trusted national icon in the country for PU/PVC/PE/Si coated Conveyors and Process Belts, Modular Belts, Metal Belts, Conveyor Rollers, DC Brushless Rollers (MDR), AC Rollers Conveyor, Drum Motors, Conveyor Components, Mechanical Power Transmission Belts, Industrial Belts, Pulleys & allied accessories.

We have modern infrastructure, with 25,000 sq' ft of office space and all the latest state-of-the-art machines installed in factory sheds spread over 1,30,000 sq. ft having shop floors laid out as per technical guidance and approved layouts from our renowned overseas associates, who are universally accepted as pioneers and world leaders in their respective fields. Our 34 years long and challenging journey has been rewarding with support from our global partners who are well respected market leader in their respective field and 100% trust of our customers we enjoyed as the guiding lights on the way. We provide up to date and affordable solutions to customers in time bound manner for attaining their goals of productivity and profitability.

At AG Group we realize that quality runs through the entire business processes and not just in our products. Quality is either something you adhere to or embrace for continuing to move forward. Standing still is not an option for doing business, so we have continually invested in the right people with superior market knowledge, who are well equipped to provide customer service. Our supply chain partners, from manufacturers to logistics are also carefully chosen to fit in with our commitment to Quality. We are well equipped to serve our customers in both Indian domestic market and international platforms as per mutually agreed terms. Besides A.G Belting Pvt. Ltd., other companies of AG GROUP are proud to be associated with Derco B.V. Holland, Continental Contitech - Germany, Movex S.p.A. - Italy, Mulco Group - Europe, Max Schlatterer Esband - Germany, Volta Belting Technologies - Israel, Zentex S.p.A. - Italy, IHF Fordertechnik - Austria, Ashworth Metal Conveyor Belts - USA, Modutech Modular belting system - Turkey, SWR Europe V Belts, Vari-Speed Belts, Special Belts. Our in-house Brands offering value-for-money to industries are PU/PVC Conveyor & process belts, Conveyor belts fabrication, AGM Timing Pulleys & Drive components, AGEROLL Conveyor Rollers, AGETEMP High temperature belts, AGECLEAN Food process conveying belts, & AGELINK MODUTECH modular conveyor belts.

GOMA ENGINEERING PVT. LTD.

Goma Group of Companies is a 40+ year old company dealing in Process Technology Equipment & High-Pressure Pumps. We prioritize

delivering high-quality products and services to our clients.

We strive for continuous improvement and the development of new solutions for the Dairy & Beverage industries. We prioritize delivering high-quality products and services to our clients.

We provide turnkey Solutions for: Milk with By product ( Curd, Lassi, Butter Milk, Paneer etc.); Ice cream; RTS Beverage, Carbonated Soft Drinks, Aseptic Beverage etc.; Fruit Pulp, Tomato Ketchup; Coconut Milk & Coconut Water processing; Vegan Products ( Almond milk, Soy milk, Oat milk, malt-based drinks, etc.); Cream, Butter, Ghee processing

We have state-of-the-art infrastructure for Fabrication, CNC Machining, Assembly, Painting, Testing, and Warehousing. Our team of highly qualified engineers designs various machines like: Homogenisers; Pasteurisers; Sterilizers; CIP Systems; UHT System Sanitary Pump; Cup Filling & Sealing Machines; Cheese Stretching & Moulding Machine; Silo's; Continuous Freezers etc.

We are an ISO 9001: 2015 as well as ISO 45001:2018 Engineering Company.

Our extensive range of equipment & dedicated team of professionals ensures that we can meet the diverse requirements of the Food & Beverage, Pharmaceutical, and Chemical industries.

Our Head office is in Thane, Mumbai. Our Manufacturing Facilities are also located nearby of our Head Office: Saronda, Gujarat, Wada, Palghar Maharashtra, Pune, Maharashtra, Vapi, Gujarat

With our representatives located in Malaysia, Vietnam, Sri Lanka, Nepal, Dubai etc. we have executed projects in 45+ countries. We also have overseas office in Kenya, Africa for better co-ordination with our African clients.
